PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with 1.7+ years of professional experience designing and delivering **scalable enterprise web applications** across Recruitment, Content Management, Election, and Warranty domains. Proficient in **React.js, Node.js, Express.js, MongoDB, PostgreSQL and Redis** with a proven track record of reducing **API response times by 20%** and improving **database query performance by 30%**. Skilled in RESTful API Design, Role-Based Access Control (RBAC), Payment Gateway Integration (Razorpay, PayPal), PhonePe, and **OAuth 2.0 Authentication**. Passionate about building **secure, high-performance, and maintainable full-stack applications**.

EXPERIENCE

KayJay Global Solutions Pvt. Ltd

Dec 2024 – Present

MERN Stack Developer

Udaipur, RJ

- Architected and Developed and maintained **4+ enterprise applications** including **Recruitment Management System (RMS), Election Management System, Content Management Systems (CMS), and Warranty Management System** supporting **multi-role platforms**.
- Engineered and optimized **RESTful APIs** using **Node.js, Express.js, MongoDB, and PostgreSQL** to support scalable backend services, implementing **pagination, caching strategies, API optimization, and indexing** for efficient handling of large datasets and high user traffic.
- Implemented **Role-Based Access Control (RBAC)** and hierarchical permission systems managing **Admin, Recruiter, Moderator, and User roles**, improving application security and access governance.
- Designed and optimized **relational and NoSQL database schemas** using **PostgreSQL, MongoDB, and Sequelize ORM**, improving query performance by **30%** through indexing and optimized data structures.
- Executed **database migrations and schema updates** using **Sequelize migrations**, ensuring smooth deployment of new features and maintaining database consistency across environments.
- Integrated **Razorpay Payment Gateway** for handling **subscriptions, transactions, and automated billing workflows**, enabling secure payment processing for SaaS features.
- Collaborated with **Frontend Developers and AI Engineers** to integrate backend APIs with **React.js** applications and AI-driven modules, improving UI responsiveness and reducing API response time by **20%**.

SKILLS

Frontend: React.js, Redux, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, React Hooks, Context API

Backend: Node.js, Express.js, MongoDB, PostgreSQL, Redis, BullMQ, REST APIs, Socket.IO, WebSockets, Sequelize, MySQL, NoSQL, Prisma, Mongoose, AWS

Tools: Git, GitHub, Postman, Linux, Windows

PROJECTS

JobConnect | [Source code](#) | [Link](#)

- Integrated **45+ REST APIs** and implemented **Google Authentication (OAuth)** where users can sign in using Google accounts. Users can create accounts as **candidates or organizations**, build detailed profiles, while **organizations can post job openings** and **candidates can search jobs** based on preferences and qualifications.
- Implemented dual-role architecture allowing **candidates and organizations** to create accounts, manage profiles, and access role-based features including **job posting, application tracking, and interview management workflows**.
- Enabled organizations to **post job openings**, manage applications, shortlist candidates, and **schedule interviews using integrated Google Calendar** with automated event creation and reminders, while candidates can **search and apply for jobs**.
- Built **direct messaging functionality** between candidates and recruiters to streamline communication and support coordination during the **interview scheduling process**.
- Implemented **resume/CV builder** allowing candidates to generate and customize CVs using stored profile data and integrated **PayPal subscription system** with automated billing, subscription tracking, and feature access based on active plans.

Blog Management | [Source code](#) | [Link](#)

- Developed a full-stack blog platform with user authentication, **allowing account creation, blog posting**, and commenting functionalities

- **Integrated content management** features for admins, enabling efficient oversight and moderation of user-generated content
- **Implemented secure user roles and permissions**, differentiating between regular users, authorized comments, and admin capabilities
- implemented a robust back-end architecture using handling data management and **API integration**
